Allowable Subject Matter

4. Claims 18-22 are allowable over prior art.

5. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on the amendment filed on 3/24/2009:

As in claim 18, the prior art of record fails to teach or fairly suggest a warpage angle measurement method having the following step:

Adjusting an inside of the first constant temperature chamber to have a predetermined environmental condition including at least one of a temperature and humidity; preparing a second constant temperature chamber, wherein the environmental conditions inside the first constant temperature chamber and the second constant temperature chamber are adjusted to have a different environmental condition from each other, and the object to be measured is first accommodated in the first constant temperature chamber and then carried into the second constant temperature chamber; and thereafter, measuring an angle of warpage of the object to be measured by emitting laser light to the object to be measured, receiving the laser light reflected from the object to be measured, and detecting a relative angle of an optical path of the reflected

Art Unit: 2627

laser light with respect to an optical path of the emitted laser light.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2627
